Profile

I am a skilled **React.js** and **React Native** developer with 2+ yrs of experience in building responsive web and cross-platform mobile applications. Proficient in **JavaScript (ES6+)**, **TypeScript**, **React.js**, **Next.js**, and state management with **Redux Toolkit** and **MobX State Tree**, I focus on optimizing performance and developing reusable components. I have hands-on experience with UI libraries like **Styled Components**, **Tailwind CSS**, **Bootstrap**, and **Material UI (MUI)**, along with integrating **Firebase** for real-time features and **Stripe** for payment processing. My strong focus on clean, modular code and collaboration ensures high-quality UI/UX across projects.

Education

09/2022 – 01/2024 **M.phil physical chemistry**
Bahawalpur, Pakistan *Islamia university*

Professional Experience

01/2024 – present **React Native Developer**
Developed multiple client mobile apps using React

Royal Cloud Candy App (React Native)

- Contributed to the development and maintenance of a production-ready React Native mobile app for a client.
- Implemented App Context for efficient state management and Firebase for real-time notifications.
- Integrated SoLoader SDK to improve app startup performance and optimize native module loading.
- Built and managed Android App Bundle (AAB) and APK files for both debug and release builds, ensuring smooth deployment and distribution.
- Collaborated with backend developers to integrate fast, efficient APIs for seamless server communication.
- Designed and added new features, including **push notifications**, enhance app functionality.
- Diagnosed and fixed bugs, optimizing performance and ensuring app stability.
- Enhanced UI/UX for a visually appealing and responsive user experience.
- Conducted extensive testing to reduce load times and ensure app reliability.
- Worked closely with clients and team members to incorporate feedback and deliver high-quality results.

Journey Event Planning App (React Native)

- Contributed to the ongoing development and maintenance of a React Native app currently live in production.
- Successfully upgraded the app from React Native 0.64.0 to 0.74.0, ensuring improved performance, compatibility, and maintainability.
- Renamed the app, handling all necessary configurations, package updates, and branding changes.
- Built and tested the app on **Mac Mini using the iOS simulator**, ensuring smooth performance across Apple devices.

- Upgraded outdated libraries and dependencies to enhance functionality and align with the latest standards.
- Identified and resolved critical issues, improving app stability and ensuring a seamless user experience.
- Added new features based on client requirements, enhancing the app's usability and functionality.

BiteMate App Project (React native)

- React Native Migration: Migrated the app to the latest React Native version, updating dependencies and optimizing the codebase for better performance and maintainability.
- State Management with Redux: Designed and maintained a scalable state management system using Redux for predictable data flow.
- Stripe Integration: Added secure payment processing capabilities, including card payments and subscription models.
- Firebase Backend: Used Firebase for backend services such as real-time database updates, user authentication, and push notifications.
- End-to-End Testing: Conducted thorough testing with Flipper and React Native Debugger to ensure stability and a high-quality user experience

2023 – 2024

Office Management System (React js)

Microservices & Single-SPA Architecture

- Worked on microservices architecture and utilized Single-SPA for managing multiple frontend applications, allowing for modular and scalable
- Developed a comprehensive **Office Management System** using **React.js**, **TypeScript**, **MobX**, and **Styled Component**.
- Led the **frontend development** by designing intuitive user interfaces and ensuring responsive layouts to improve user interaction.
- Integrated **state management** with **MobX** and **Redux Toolkit** to handle complex application logic and improve data consistency across components.
- Enhanced the user experience by implementing dynamic forms, tables, and data visualization features using **Styled Components** and other UI libraries.
- Collaborated with backend developers to ensure smooth data flow and integrate APIs for a seamless office management experience.

Storybook Component Library

- Created and maintained a **Storybook** component library for a project, enabling a consistent design system and reusable components across multiple web applications.
- Integrated the component library into web projects as a package, streamlining the development process and ensuring consistency.

Skills

JavaScript (ES6+) ,TypeScript , React.js , React Native , Next.js ,Redux/MobX , Single-SPA , Styled Components, Tailwind CSS , Material UI (MUI) , Ant Design (AntD) , HTML5 , CSS3 , Bootstrap , Firebase Integration , Stripe Integration , Version Control (Git/GitHub) • Debugging Tools (Flipper, React Native Debugger) • Micro services Architecture ,API Integration , Performance Optimization , Package Management (NPM/Yarn)
